

Our Polemounts are guaranteed for optimal performance!

Need a bank, with matching impedances, or a single Polemount for your project? **JCL Energy** is a great place to start searching!

Standard Features

- Lifting Lugs
- ANSI Support Lugs
- Arrester Mounting Pads
- Polyester Insulated Cover
- Tank Ground Pad
- High-Voltage Porcelain Bushing(s) w/ Eyebolt Terminals
- Low-Voltage Bushings
- Low-Voltage Neutral Grounding Strap
- Oil Fill Plug w/ Cover Ground Strap
- Low-Voltage Leads
- Self-Venting / Resealing Cover
- Corrosion-Resistant 15 kV Dielectric Insulation on Cover
- Durable, Corrosive-Resistant Paint

Optional Features

- Primary Protective Link
- Surge Arrester
- Secondary Circuit Breaker
- Secondary Breaker Operating Handle w/ Emergency Overload Reset
- Overload Signal Light, if desired

We have thousands of Polemount Transformers **in-stock** for your residential or commercial application, **ready to ship!** Whatever your need, you will get exactly what you need! And, **fast!**

New and Reconditioned Polemounts in-stock! Ready to ship options available!

 *UL Listings Available!

Reconditioning Process

We ensure that all of our Reconditioned Polemounts are methodically tested and restored - backed by our 3-Year Warranty.

Our process includes, but **not** limited to:

- TTR and Megger Testing
- HV / LV Winding Resistance Testing
- Phase Polarity Testing
- Impedance Testing
- No Load and Load Loss Testing
- Oil Dielectric Sampling
- Pressure Testing
- Gasket Inspection / Replacement
- Pipe fittings are resealed
- All components are inspected, tested and replaced, if needed
- Fluids tested / processed or replaced
- Finished with a high-quality industrial paint. Custom colors **are** available
- QC Department performs final testing before unit is deployed into the field
